

Notes on the list

Post. Chef means the head of the Intelligence Department, Sekchef head of one of the sections into which it was divided, GSO general staff officer and SO staff officer – the latter two were doing the same jobs, but GSOs had been formally transferred into the general staff.

Dates in post. Very often, I only have a reference in a document to an officer being in the department on a certain date, but not the actual date of arrival or departure. In these cases, the officer was probably there before the first date and probably still there after the second one. These dates are *in italics*. I sometimes know the precise dates an officer was posted to OHL, and unless I have evidence otherwise, I've assumed all this time was spent in the Intelligence Department.

Guards. As in my book *Holding Out*, I define a Guards officer as one who served at least five years in a Guard unit.
